SUMMARY

Experienced frontend developer with 4 years of experience, focusing on crafting compelling user interfaces. Proficient in building single-page applications and responsive websites. Enthusiastic about learning and applying the latest web programming techniques and incorporating UI/UX design principles. Possess strong communication and collaboration skills, adept at working with diverse development and design teams.

EXPERIENCE

Asnaf Panel (oct 2023 - mar 2024)

Front-End Developer

- Utilized Bootstrap Vue for crafting responsive and visually appealing user interfaces in this project.
- Implemented efficient state management solutions using Vuex to enhance application performance and scalability.
- employed JWT for securing web services requiring token authentication.
- Developed a custom REST API, enriching it with relevant data to optimize functionality and user experience.
- Optimize applications for maximum speed and scalability

Car exhibition CRM (Jan 2023 - Jun 2023)

Front-End Developer

- Managed front-end development tasks, ensuring high-quality user interface design and functionality.
- Used TypeScript to improve project performance.
- Developed a responsive and interactive user interface, integrating Nuxt.js and Bootstrap Vue components for optimal performance and user engagement.
- Write clean, efficient, and well-structured code using HTML, CSS, and JavaScript
- Assist in website maintenance, updates, and enhancements
- Conduct thorough testing and debugging to ensure seamless functionality

Sazadeh's engineering office software (Dec 2022 - Sep 2023)

Front-End Developer

- Designing and implementing scalable, modular, and reusable code with Vue.js and Nuxt.js
- Developing reusable UI components and page templates
- Proficiency in HTML, CSS, JavaScript, and related frameworks and libraries
- Experience with version control systems (e.g., Git) and code review processes
- Optimizing web application performance by identifying and addressing performance bottlenecks

Id	Product	(Feb	2020	-	Jul	2022)
----	---------	------	------	---	-----	-------

Full-stack Developer

- Developed backend functionalities using Node.js, handling server-side logic and data manipulation.
- Implemented frontend interfaces using Vue.js and Bootstrap Vue, ensuring responsive and interactive user experiences.
- Utilized MongoDB as the database solution for storing data, leveraging its flexibility and scalability for handling document-based data.
- Employed Sequelize ORM (Object-Relational Mapping) to interact with relational databases, such as MySQL, for efficient data management.
- Implemented middleware for handling requests and responses, enabling modularization and extensibility of the application.
- Faced a challenge in efficiently storing system logs. Overcame this challenge by establishing relationships between database tables, enabling seamless storage and retrieval of detailed log data.
- Assist in website maintenance, updates, and enhancements

Malima platform (Mar 2019 - Jul 2019)

Front-End Developer

- Experience with version control systems (e.g., Git) and code review processes

- Design, development and implementation of state-of-the-art front-end solutions for our web applications, taking into account user-friendliness, performance and security.
- Sound knowledge of HTML, CSS and JavaScript as well as experience with responsive design and the implementation of mobile applications.
- Develop and maintain web applications using Vue.js.
- Optimize applications for maximum speed and scalability.

SKILLS

- **Vue.js, Nuxt.js**
- Express.js
- **Html5, CSS**
- **Bootstrap, Bootstrap Vue, Tailwind**
- **JavaScript**, TypeScript
- **Git, GitHub, GitLab, Trello, Jira**, Scrum, Agile
- Linux

Education

BACHELOR'S DEGREE

Software Engineer-North Khorasan Technical and Vocational University Enghlab - (2015-2017)
